

## **Spam coming into the WordPress Contact form on ShredShotz**

(2 Feb 2024)

Noted that many spam messages are arriving in my [chris@silverwolf.co.uk](mailto:chris@silverwolf.co.uk) sent folder via the ShredShotz Contact form – 85 messages since December 18<sup>th</sup>. Messages come in at 2 or 3 a day. Will try various things to check for most effective solution.

Contact form is standard Divi module Using Basic Captcha which shows on the form as a numeric addition.

Cloudflare plug is active.

### **Solution #1**

2 Feb 2024 (14:24) Updated Cloudflare settings for all Default WordPress Forms (except for *WordPress login*).

Seems to have resolved.
